## GRANULATED MAGNESIUM LIME

### Product Specification

EU legislation for liming material changed in May 2013, and producers must now declare total calcium content, magnesium content, neutralising value and fineness of all natural magnesian liming material.

Calcifert Mag meets or exceeds the specifications for fine quality magnesian limestone across all criteria.

	Minimum requirements (for fine quality magnesian limestone)	Calcifert Mag
Total Calcium (Ca)		21.8%
Total Magnesium (Mg)		11.5%
Total Magnesium (MgO)	3%	19%
Neutralising Value	52	56
Fineness	at least 97% to pass through a 2mm sieve	> 99%
	at least 80% to pass through a 1mm sieve	> 99%
	at least 50% to pass through a 0.315 mm sieve	> 99%
	at least 30% to pass through a 0.1mm sieve	> 69%
<i>Optional declarations</i>		
Reactivity		29.4%
Moisture		< 1%
Soil incubation results		TBC
