

## Product Specification

	Minimum requirements (for fine quality limestone)	Calcifert Granulated Lime + Boron & Zinc
Total Calcium (Ca)		36%
Total Boron (B)		0.36%
Total Zinc (Zn)		0.36%
Neutralising value	50	54
Fineness	at least 97% to pass through a 2mm sieve	> 99%
	at least 80% to pass through a 1mm sieve	> 99%
	at least 50% to pass through a 0.315mm sieve	> 99%
	at least 30% to pass through a 0.1mm sieve	> 84%
<i>Optional declarations</i>		
Total Magnesium (Mg)		< 0.5%
Reactivity		100%
Moisture		< 0.5%
Soil incubation results		TBC

Calcifert Lime BZn also includes humates and bio-stimulants derived from green seaweed extracts, supplying both humic and fulvic acids.
